**ATTENTION!**

Handle profile should be 2 mm longer than board height.

WARNING

SEVROLL does not bear any responsibility for deformation resulting from the application of improper quality of boards (improper storage, improper humidity)

ATTENTION:

Board to mirror contact area should be free from dirt and grease before applying double-sided tape.

Broken line indicates recommended positioning of double-sided tape

ATTENTION!

Remove protective film from aluminium elements (handles, tracks, connectors, etc.) prior to cutting them to the desired size. Film removal will reveal quality issues (eg. scratches)

VICTORIA II C, ALFA II C

Installation method for handle and guiding carriage with # 18 mm board

- When fitting handle profiles, do not use assembly adhesive
- The handle should be fixed to board with fastening screws $\varnothing 3 \times 13$ on the inner door face

Installation method for handle and guiding carriage with # 12 mm board + # 4 mm mirror

If the board or mirror is too loose on the handle profiles, screw the handles to the board using $\varnothing 3 \times 10$ screws.

Screw are available from Sevroll-System
